13.8.18

Magnets

A magnet is a piece of metal that pulls different types of metal to itself. The force of magnet is called magnetism.

By: Julia

6.8.18

What is Solar Energy?

Solar energy comes from the sun. We need solar energy to keep us warm. We use the sun to dry our clothes.

By: Ashley

1/8/18

Force

What is force?
Force is the energy inside our body that helps you to push and pull things.

By: Katutu

9.8.18

What is gravity?

Gravity is a force that pulls things down. Without gravity everything will be floating up in space. The water was pouring down in the jug because gravity pulls it down. Gravity pushes and pulls things down and I pull and push a car.

2.8.18

Electricity

What is electricity?
Electricity is power that we get from charged wires and chords. At home we have electricity. At home we have lights. Electricity is all around us. A car has electricity from it's gas and battery.

By: Vaughn

31.7.18

Energy is all around us.

Energy makes us strong. When your dancing fast it gives you energy and the sun gives you energy. When you eat you will have lots of energy and you will drink water when you keep running you will have energy when your moving. You have energy when you exercise.

Rugby postponed

The Otago Interschools Rugby tournament has been moved to next Friday, September the 7th. This was because the fields at Sir Barry Curtis Park were closed by the Council. Hopefully with some fine weather the fields will dry out and our Boys and Girls teams will get to play.
